

RT-2514 Full Automatic N95 Mask Making Machine

Products description:

The automatic folding mask all-in-one machine is controlled by a microcomputer program to complete automatic production, from automatic bonding of 3 to 6 layers of raw materials, automatic nose bridge strips, automatic breathing valve punching, automatic folding molding and automatic ear band welding. Multiple servo systems cooperate with high-precision conveying systems. Different positions of the photoelectric integrated sensing probe and intelligent positioning system are closely matched with each

production station. Multiple intelligent correction systems and reset devices ensure product quality and equipment stability.

Product Features

1. Fully automated production of folding mask equipment, controlled by microcomputer, from raw material to finished product output, completed automatically. High yield
2. The design concept is mature, the operation is simple, and it is easy to get started, which can meet the needs of producing various folding masks.
3. High production efficiency, folding molding, strong and beautiful welding of ear bands, strong pulling force, automatic breathing valve punching, automatic nose bridge strip and automatic printing function (optional).
4. The equipment runs stably and has long-term continuous action, and the product qualification rate is over 98%.
5. The equipment is automatically controlled, the operation is smooth, and the product production is stable. With multi-segment monitoring system to ensure stable product quality.

Technical parameters

1. Machine size: 7600 * 1500 * 1900
2. Machine weight: 1660KG
3. Materials for mask production: 3 ~ 6 layers of non-woven fabric, melt-blown fabric / nasal bridge strip / ear band line
4. Working voltage: 220V
5. Working power: 6KW
6. Working pressure 6KG / CM²
7. Equipment output: 50-55pcs / min
8. Finished product type: folding mask, one machine can produce many types of folding masks. Folding masks for adults N95 masks, children N95 masks, 3M masks
9. Product size error: ± 1 mm (excluding raw material error)
10. Equipment color: white
11. Commissioning time: 1 day (online guidance)
12. Production cycle: 25 working days
13. Suitable industries: production of sanitary supplies, medical supplies, protective supplies and other industries.
